

DOLPHIN MOTOR COACH, OZOTECH AND NDW JOIN FORCES TO BRING GREAT TASTING, SAFER WATER TO CAMPERS EVERYWHERE

Elkhart, Indiana, June 18, 2018 – Dolphin Motor Coach, a luxury leader in the fast-growing Class B motorhome market, Ozotech, a global distributor and leading manufacturer of activated oxygen/ozone generating equipment and No Dirty Water (NDW), a leader in ozone based water filtration and purification systems, today announced a joint effort to bring cleaner, safer, odor-free and great-tasting water to campers everywhere for the first time ever.

NDW has combined a 5-micon filtration system with Ozotech's proprietary activated oxygen/ozone generator to create an ideal clean water system that filters out most impurities and provides antimicrobial protection from 99 percent of E.coli, coliform and legionella – some of the most common causes of water-borne diseases. The NDW system provides for purification and continuous ozonation in recreational vehicle (RV) holding tanks with a capacity of up to 2,880 gallons per day in a package that draws one Amp of power and weighs less than 10 pounds. In partnership with Dolphin Motor Coach, the NDW water purification system is now available on all of Dolphin's luxury Class B motorhomes.

Clean drinking water is essential to life, yet every year there are reports of health problems and serious illnesses caused by a lack of clean, contaminant-free water. Even in the United States, well water at campgrounds can be affected by bacteria and microorganisms that may cause serious illness. Many RV parks and campgrounds have their own private water wells that may be at greater risk of contamination from a variety of sources from animal waste from nearby farms, to older, leaking septic systems. So how can consumers be assured their water is safe to drink?

"Water is essential to life, and access to clean, great-tasting water is critical to consumers and families that want to enjoy time outdoors," said John Sztykiel, President of NDW. "The combination of Ozotech's industry leading activated oxygen/ozone generation equipment and NDW's filtering system provides the ideal solution for RV consumers to provide safer, cleaner water than alternatives available in RVs today, in a way that is both green and cost effective. NDW is a true water purification system that goes well beyond traditional reverse osmosis or other filtration systems, and that's what has us excited."

NDW provides a complete filtration and activated oxygen/ozone system to clean and disinfect city water, storage tank water and well water from your favorite campground that removes chlorine, fluoride, pesticides and many other chemicals. How it works: when the water from the storage tank is being used, the pump sends the water from the storage tank through the filter to the distribution system. At the same time, a portion of the filtered water is injected with ozone gas (the most powerful natural disinfectant on earth) and is routed back to the water storage tank.

When the pump turns off the ozone also turns off and stays off while the water distribution pump idle. Disinfection of the storage tank is continuously occurring while the pump is pumping water.

“At DMC we are always looking for new ways to enhance the RV experience of our owners, and partnering with NDW to provide safe, clean and healthy drinking water in an environmentally friendly way fits the bill,” said Darryl Connors, President and CEO of Dolphin Motor Coach. “By providing the NDW system on all of our coaches, we can meet the demand of our end customers for great tasting water without the environmental impact of packing bottled water for the trip. With a DMC coach, our owners will no longer have to worry about what’s in their water tank or at the campground. They can be confident in the water that comes from their coach.”

Steve Christiansen, head of sales and operations at Ozotech commented, “We are pleased to partner with NDW and DMC to provide a market redefining, innovative solution for drinking water while camping. We are committed to the power of ozone technology to provide cleaner, greener solutions and we see many opportunities to expand our relationship over the long-term.”

About Dolphin Motor Coach

Our Mission at Dolphin Motor Coach is to have the passion to be the best in the industry with our Best in Class Sprinter & Ram® ProMaster Class B Van designs, first-rate customer service, excellent 5-year, 60,000-mile warranty and our continued innovation that revolutionizes your RV Lifestyle experience.
