

IQ-20 Air Dryer

The IQ-20 Air Dryer is a single bed, air drier that delivers dry air by day and regenerates its drier bed at night. The powder coated enclosure protects the electronics while the timed electronics insure dry air during its hours of programmed operation. It operates with 115 VAC or 230 VAC and will deliver 20 cubic feet per hour of dry air.

The IQ-20 unit is suitable for indoor or dry locations only. If installed outdoors, the unit must be protected from the elements.

FEATURES

- Single chamber heat regenerative dryer.
- Manually controlled timer to set regeneration time.
- Wall mountable

BENEFITS

- Can be used with a wide range of small ozone generators
- Lightweight and corrosion resistant
- Simple and reliable operation
- Easy to service

OPERATION

Cubic ft/hr: 5-20 SCFH

Wattage: 50 VA Typical, 90 VA Max

Dew point: -50°F from 100% to 25% R.H.

Voltage: Available in 115 and 230 VAC, 50 or 60 Hz

SHIPPING & LEAD TIME

Dimensions: W 10" x H 12" x D 4"

Shipping Weight: 5 lbs.

Max Lead Time: 7 days

SKU	Model	Voltage
30339	IQ20	115 Vac, 60 Hz
30339-26	IQ20/F/60Hz	220 VAC
30339-25	IQ20/F/50Hz	220 VAC
