

## IQ-40 Air Dryer

The IQ-40 Air Dryer is a dual bed, air drier that delivers dry air 24 hours per day. Its dual bed design allows one dryer bed to regenerate while the other dryer bed is in service. The powder coated enclosure protects the electronics while the timed electronics ensure dry air 24/7. It operates with 115 VAC or 230 VAC and will deliver 40 cubic feet per hour of dry air.

This model provides a cost effective alternative to “Oxygen Concentrators” for numerous applications. The IQ-40 is suitable for indoor or dry locations only. If installed outdoors, the units must be protected from the elements. Ozotech, Inc. generators should be accompanied by proper air preparation.

### FEATURES

- Lowest dew-points of any heat regenerative dryer
- **“Intelligence Factor”** Remembers cycle point when power is interrupted and restarts at that point.
- 5.56 mm character height, panel mount LCD display (value-added option) provides current status of regeneration cycle

### BENEFITS

- May be used with a wide range of small ozone generators
- Lightweight and corrosion resistant

### OPERATION

**Cubic ft/hr:** 5-40 SCFH

**Wattage:** 90 Watts

**Dewpoint:** To -50°F at useable air flow rates

**Voltage:** 120 or 208-230 Vac

### SHIPPING & LEAD TIME

Dimensions: W 10” x H 12” x D 4”

Shipping Weight: 15 lbs.

Max Lead Time: 10 days
