

AIM 15

Industrial-Grade Ozone Generator

The AIM 15 ozone generator boasts a user-friendly interface and robust construction, ensuring reliable performance in demanding industrial environments. Its design allows for easy integration into existing water bottling systems, providing seamless operation without requiring extensive modifications. The AIM 15 utilizes advanced ozone generation technology to achieve high levels of disinfection while minimizing environmental impact, making it a sustainable choice for water treatment applications.

With its compliance with FDA, USDA, and IBWA guidelines, the AIM 15 offers peace of mind to water bottling facilities, ensuring that their products meet stringent regulatory standards for quality and safety.

APPLICATIONS:

- Water treatment
- Aquaculture
- Hydroponics
- Bottled water
- Commercial aquariums

ELECTRICAL:

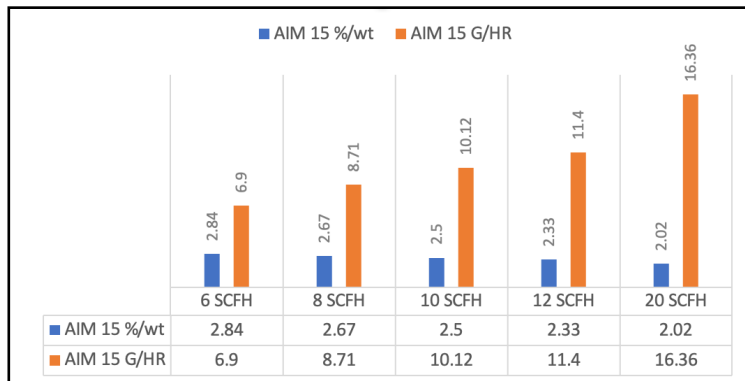

115 or 230 Vac
50-60 Hz
200 Watts

OZONE OUTPUT:

Up to 16.36 grams per hour at 20 SCFH

DIMENSIONS:

9"W x 27.5"H x 10"D
Shipping Weight: 50 lbs.

All flow rates are based on 95-98% concentrated oxygen.

SKU	Model	Voltage
30365-02	AIM 15	115 Vac
30365-03	AIM 15-F	230 Vac
